

## XEROX DOCUTECH 2000 SERIES

# XwSCAN

### If you want a job done right, do it yourself

At Xerox, we understand the value of having control over the documents your business creates and manages. After all, control is what printing on demand is all about—getting your documents when you want them, where you want them, and in exact quantities.

Until now, Optical Mark Recognition (OMR) forms have typically been outsourced. XwSCAN, a total solution for OMR forms creation and production printing, shortens the forms creation process to literally hours with point and click functionality. No longer will you have to wait 3 to 5 weeks for the design of a new OMR form. No longer do you need to purchase large quantities of offset printed forms and store them. Now, when you want an OMR form, you get it... on demand.

And once the OMR form has been marked-up and submitted, you will have the ability to immediately scan and capture the information it contains—information you need to better serve your customers, whether it's grading their test answers or analyzing their survey responses. Print on demand coupled with just-in-time information collection and assessment is just the kind of productive end-to-end work process solution you expect from Xerox, The Digital Document Company.

### Features and Benefits

- DocuTech on demand printing eliminates storage costs and risk of obsolescence for OMR forms.
- Simultaneous form and data printing causes no disruption in current workflow.
- Design tools are easy to use and learn. Even complex documents can be designed in a matter of hours.
- Icons allow exact placement of OMR objects (lines, texts, timing tracks, boxes, bubbles, etc.).
- Automatic boxing of scan response areas; automatic numbering of items and questions; automatic defaults for document configurations.
- Portrait and landscape document design as well as inverted portrait and reverse landscaping.
- Insertions of graphics, logos, and images.
- Cut and paste capability from inside and outside the current OMR document.

### Minimum System Configuration

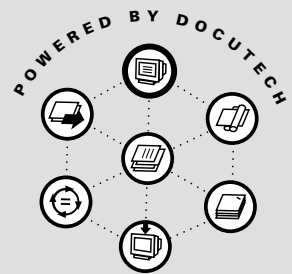

- Pentium 133MHz or faster processor.
- Windows 95, 98 or Windows NT.
- 16MB memory or higher; 20 MB storage.
- Xerox DocuTech 2000 Series Publishers.

### Specifications

- OMR Font Compliance; usage of Windows fonts plus creation of custom designed fonts for PostScript printers.

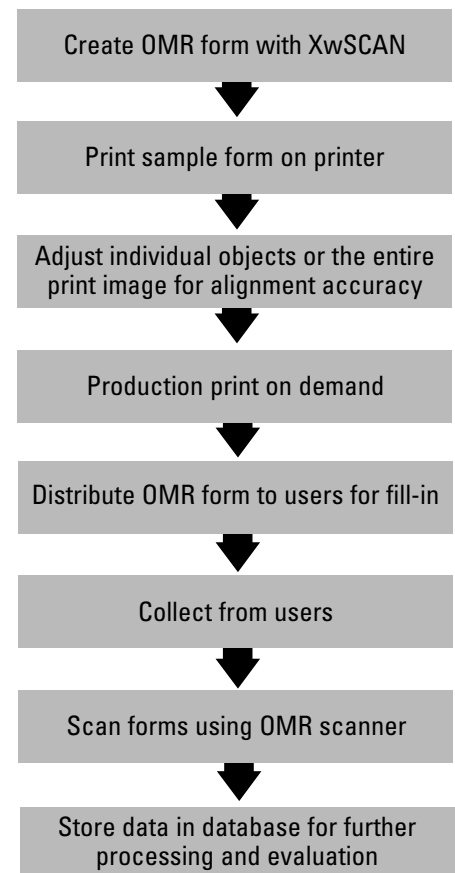

### Scanner Compatibility

- NCS OMR OpScan models 3, 4, 5, 7, 10 and 21.
- NCS Optical Imaging 5000 system.
- Scanning Systems SR600, 700, 360, 380 and 9000 models.
- Scantron 8000, 8200, 8400, 8600 and Scan Mark series.
